AUSTRALIAN HARD

AH

ALTERNATIVE TO:

**BECKOM[®] CONDO[®] LRPB SPITFIRE[®]
SCEPTER[®] SUNTOP[®]**

FARMER TO FARMER
TRADE APPROVED

SOUTH-EASTERN ZONE 2020
(SOUTHERN NSW)

Variety Overview

VIXEN[®] is the highest yielding, quick-mid maturing (similar to SPITFIRE[®]) AH wheat in the South-Eastern region. VIXEN[®] offers a significant yield advantage, on average, compared to CONDO[®] (approx. 11%*) and SPITFIRE[®] (approx. 18%*) in Southern NSW. VIXEN[®] yields similarly to SCEPTER[®], on average, based on NVT MET yield performance.

VIXEN[®]'s maturity is ideally suited to sowing from mid-May onwards. With the amount of SCEPTER[®] grown in wheat programs, VIXEN[®] provides a true varietal opportunity to spread flowering windows during critical spring stress periods. In addition to the variety's stand-out yield performance it offers good stripe (MRMS) and stem (MRMS) rust and yellow leaf spot (MRMS) resistance. VIXEN[®] has strong physical grain characteristics. It has good grain size and hectolitre weight. It also has a short plant height, providing reduced stubble loads in high yielding environments.

VIXEN[®] is available from local Seedclub members and resellers and is approved for farmer to farmer trade.

A cunning variety for those looking to win the quick-mid maturing, AH wheat race.
