

THE RISE OF MAXIMUS ϕ CL

NEW MAXIMUS ϕ CL MAKES ITS ARENA DEBUT AFTER NINE YEARS IN THE MAKING.

BORNE FROM THE SUCCESS OF SPARTACUS CL ϕ IN THE FIGHT AGAINST WEEDS WITHIN THE CEREAL ROTATION.

THE ELITE LINE COMES TO PADDOCKS FROM SMALL BEGINNINGS, ONE OF HUNDREDS OF THOUSANDS OF PLANTS, FOLLOWING AN INITIAL GLASSHOUSE CROSS IN 2011.

MAXIMUS ϕ CL PROVED ITS ABILITY EARLY IN TRIALS, CATCHING DAVID MOODY'S EYE, WHERE IT STOOD TALL AND PROUD, EXHIBITING IMPROVED EARLY VIGOUR WHEN SIDE BY SIDE WITH SPARTACUS CL ϕ .

ITS STRONG GENETIC BACKGROUND HAS GIVEN THE VARIETY EVERY OPPORTUNITY, COMBINING FAVOURABLE TRAITS THROUGH SUCCESSFUL CROSSES, LARGELY DERIVED FROM THE HOUSE OF SPARTACUS CL ϕ .

MAXIMUS ϕ CL'S EARLY ARENA TALENT DELIVERED CRUSHING RESULTS IN RIGOROUSLY ASSESSED EARLY AND LATE GENERATION FIELD TRIALS.

IT'S PROVEN SUCCESS IS ATTRIBUTABLE TO THE GLADIATOR'S WHOLE PACKAGE, WITH ITS HIGH YIELD, IMPROVED DISEASE, GOOD GRAIN QUALITY AND ATTRACTIVE POTENTIAL MALTING CHARACTERISTICS.

IN 2018, MAXIMUS ϕ CL ACHIEVED ANOTHER CAREER MILESTONE WITH ACCEPTANCE INTO THE BARLEY AUSTRALIA MALT ACCREDITATION PROGRAM.

MAXIMUS ϕ CL WILL TAKE TO PADDOCKS IN 2021 IN ALIGNMENT WITH EARLIEST POTENTIAL MALT ACCREDITATION.

BE SURE TO TAKE A GOOD LOOK AT THE VARIETY IN YOUR ARENA IN 2020!

Growing Together
