ABOUT US

InterGrain is a world class plant breeding company currently experiencing significant growth. Our mission is to deliver profitable wheat and barley varieties for Australian growers.

The role of the Milling Technician is integral to the achievement of our future plans. This is an opportunity for an experienced and technical person to apply their expertise to primarily operate and manage a laboratory mill within a collaborative and vibrant working environment.

THE ROLE

This role is an:

- Opportunity for an experienced mill operator (wheat flour) to work in a unique setting.
- Or to utilise your technical expertise and conducting genuine interest in manufacturing to learn flour milling.

This hands-on role is responsible for managing sample receipt, daily milling activities, maintenance of equipment and laboratory quality testing. Milling activities may fluctuate due to the seasonal nature of grain production. During low pressure periods it is expected that the Milling Technician will assist in other duties within the cereal chemistry laboratory or warehouse operations. This role will report directly to the Cereal Chemist and work closely with the quality laboratory team.

MILLING TECHNICIAN

- **Leading Australian Cereal Breeder**
- **Location Bibra Lake WA**

The Milling Technician will be required to perform a wide range of technical functions including:

- Being responsible for efficient coordination of daily milling activities and prioritise daily workloads in consultation with the Cereal Chemist
- Being responsible for meeting sample throughput targets
- Manage sample receipt and prepare wheat samples for milling, including cleaning, compositing, moisture analysis and conditioning.
- Follow milling procedures and maintain accurate records.
- Daily monitoring and follow up for milling efficiencies and product quality
- Utilise unique milling skills to troubleshoot/perform mill adjustments as needed to maintain mill consistency
- Fix small mechanical problems
- Maintain an accurate mill repair schedule
- Establish and implement a maintenance program
- Other duties include, operate laboratory sample mills, perform wheat quality testing, accurately record test results, maintenance and cleaning of laboratory equipment, manage sample storage

Candidate will have the following qualities;

- Milling experience (desirable)
- Completion of milling qualifications viewed favourably
- Strong focus on obtaining accurate results
- High attention to detail
- Sound working knowledge of management of samples in a food, agriculture testing environment
